About Me

I am a software engineer with an unquenching thirst for learning and with a passion which drives me to keep myself updated with upcoming trends and technologies. I believe in writing clean and reusable object oriented code.

I bring in a lot of positive energy into the team and create a lively work environment.

Professional Summary

Systems Engineer (Dec 2013 Onwards)

Tata Consultancy Services Limited

Worked for one of the world's leading banks, involved with requirement analysis through direct interaction with the clients, test scenario identification, defect management

Developed a knowledge transfer tool for effective training of the new joiner associates

Showcased a POC on mobile automation testing for mobile web and app

Trained fellow teammates on tool development

Assistant Systems Engineer (Dec 2011 – Dec 2013)

Tata Consultancy Services Limited

Worked for one of the world's leading banks, as an Assistant Systems Engineer

Skills

- ❖ Android
- ❖ Java
- ❖ C

Interests

- ❖ Mobile Application Development (Android)
- ❖ Web Application Development

Personal Projects

Meeting Hall Application

Developed a meeting scheduler android application which helps book a meeting room online and eliminates the availability of it to others in that time frame.

Shake Shake

Developed an android application for professionals attending long duration meetings. In case, an important discussion is interrupted by an unnecessary call, just shake the phone to turn it to silent mode or to reject the call.

Tamil Puli (Exclusive for Tablets)

Developed an android application for children to read, learn and write Tamil alphabets in a friendly animated environment. This application was designed for an NGO and it got an overwhelming response from the children.

Alarm

Developed an alarm in android with minimalist user interface.

Light a Dream

This rails web application helps sports persons to live their dream by registering and getting a trainer, a sponsor and also a view of the events lined up around the world at that very moment. Presented it in CMA hackathon.
